

Tanlake Flowmetering

Newsletter

VOLUME 1, ISSUE 7

OCTOBER 2009

Welcome to our latest Newsletter.

It has recently come to our notice that some of our customers have been led to believe that we have ceased trading, or that our products are no longer available. It is not true.

Although I have been less active than usual during the last six months due to a serious illness, I have now been given the all clear and it is business as normal!

I would like to thank all those who have expressed good wishes during my illness, which was a very difficult time for me, and please rest assured that all is now well and I am looking forward to resuming my normal level of service. For those of you who were not aware, I apologise if the service you received was below what would normally be expected.

To celebrate my return to good health, I have decided to take on a new challenge and I have been appointed Regional Manager for SlurryKat UK. This fits in nicely with my Flowmetering business which will continue as usual.

A SlurryKat Trailing Shoe machine with a Tanlake Flowmeter incorporated.

SlurryKat of Northern Ireland produce quality slurry equipment and I am pleased to be associated with them. With immediate effect I am able to supply the full range of machinery as described in the enclosed catalogue, together with the full range of spares for Doda Pumps. SlurryKat are main agents for Oroflex Hose, and a supply is held in stock at our Bristol depot, or larger orders can be despatched direct from the supplier to the customer at short notice. The quoted cost includes delivery and genuine Bauer Couplings.

Flowmeters

We now hold a comprehensive stock of Flowmetering items and in most cases systems can be supplied from stock, either for self-fit or an on-site service.

DEMONSTRATION DAY

We would like to invite any of our customers who are available between 11am and 3pm on the 21st October to a working demonstration of our Trailing Shoe fitted with a full Flowmeter system. The demonstration will be held at Manor Farm, Hardington, Frome BA11 2RE (South of Bath). Other slurry machinery will be available for viewing. Hot refreshments will be available on site. If you wish to attend this demonstration please let us know for catering purposes.
