**Merry Christmas to all our customers—past & present**

Since our last Newsletter we have been busy developing our product range and have some exciting new products which have been designed to build on the foundations established over many years.

We have replaced the basic in-cab display with a more modern touch screen

**NEW!**

display that will fasten to the windscreen with its own suction pad.

The information displayed is Flowrate and Totaliser in both metric and imperial units.

There is an easy reset on the touch screen.

Approximate screen size 120mm x 60mm.

**KROHNE**

**SIEMENS**

**NEW!**

### Replacement for the LH5000

We have developed in conjunction with one of our partners, a new and unique in-cab touch screen display/controller. This instrument displays date, time, job identification, together with forward speed, flow rate and totaliser, as well as giving an up to date and instant application rate in M3/Ha. All the information is retained in an internal memory and downloaded via memory stick. It is also capable of acting as a flow controller for installation on tankers.

### Tinytag Input Data Logger for Flowmeters

The Tinytag can be used on a static installation and will accurately record volumes of flow through the meter between specified times. For instance, if it is set to record once every minute it will capture the flow volume data either in graph or numeric form and clearly show the total volume passing through the Flowmeter every minute. Downloadable onto Excel sheet. **M-Certs approved.**

**NEW!**

### Topcon X25 Touchscreen Console

High Performance 8" Colour Display

**NEW!**

### Protective Cover for Krohne Flowmeter

Following our outstanding success with protective covers for the Siemens Flowmeter, we have now designed and produced a similar cover for the Krohne. Although the Flowmeters are rated at IP67 we have found from experience that pressure washing and slurry

generally is detrimental to the overall condition of the Flowmeter. These reasonably priced covers are the solution!

We wish all our Customers a Very Merry Christmas and a Prosperous New Year
